

In the Specification:

Page 9, line 16, after "hook", delete "21" and add -22-.

Page 10, line 5, after "hook", delete "21" and add -22-; and line 8. After "hook", delete "21" and add -22-.

Page 12, fist line, after "bow end 30". add - Further, the distance is at least one hundred percent greater, or twice the distance from the end 37 of slot 35 to the port 27, than the distance from the port 27 to the bow end 30. -.

In the Claims:

Elected Claims 1 through 4 and 8 are amended as set out in the enclosed Amendments to Claims - Per 37 CFR 1.121.

REMARKS

Claims 1 through 4 and 8 remain in the case after this amendment.

Applicant notes the objection to the drawings citing the reference character as having been used to designate both the bait and the barbed hook. Responsive thereto, applicant in a review of the drawings determined that an amendment to the Specification, changing the reference character identifying the "hook 21" to "hook 22" would correct the drawings objection. Accordingly, applicant has here amended the Specification to properly identify the hook as being "hook 22", as shown in the drawings.

Additionally, applicant has here amended the Specification to better set out the distance relationships of the port to the bow, stern and slot formed into the stern of the wingcase wobbler that are critical to a proper functioning of the "wingcase wobbler" of the invention, as shown in Fig. 4.
